

**The Drivers Arm Shade, summer is here. If you drive for a living in the summer you can't hide from the sun. So shade your arm for safety and comfort. You will feel cooler.**

*The drivers arm shade is a hydrowick sleeve (washable 100 times) that blocks a average of 70% of all 3 sunlight rays. comes in 7 different colors, Made in America.*

([PRWEB](#)) May 12, 2004 -- While driving semi truck I was inspired to develop The Drivers Arm Shade, from a bad sun burn and the intense heat on my door panel from the sun. I was also inspired by the amount of fuel my rig used by running my air conditioning on days when I'd rather have my window down. The Drivers Arm Shade is a mess hydrowick sleeve (performs like a cotton) washable 100 times, as sunscreens you have to reapply plus they don't block visible or infra red sun lights. The Drivers Arm Shade will keep you cooler when you use it. If you don't believe me just take it off. If you develop skin cancer on your arm, the lotions and sun screens for that type of injury are atleast \$20.00 a tube. Which is more than The Drivers Arm Shade. Keep one or two in your truck or car today. Being cloth The Drivers Arm Shade could last for years. The less a/c you use, the more fuel you'll save. The Drives Arm Shade will pay for itself with fuel savings in less than a month. With limited a/c use.
