

Working outside and can't hide from the sun?

Do get sunburned while your driving to make a living. Get The Drivers Arm Shade. A Hydrowick mess sleeve (washable 100 times) To be worn for shade protection. 7 different colors.

([PRWEB](#)) May 13, 2004 -- I invented The Drivers Arm Shade while driving a semi truck from cleveland to toledo during mid day hours. I developed a painful sunburn, and whatever I tried, I couldn't keep my arm out of the sun. I know there is alot of truck drivers who face far worst than myself. So I designed The Drivers Arm Shade to be lightweight, portable, washable (100 times), durable, 7 colors, comforting, even makes you feel cooler. Works great with or with out air conditioning. If you drive for a living it's a must have. The Drivers Arm Shade is made in The UNITED STATESOF AMERICA. If I went on a long haul and I forgot my Drivers Arm Shade! I would buy another one on the way.
