

Trucktaxplus.com poised to help truckers reduce business cost and increase profits

BPM Outsourcing launches niche business support services for Independent Owner-Operators and small fleet owners in the Trucking industry.

TORONTO, ONTARIO ([PRWEB](#)) June 2, 2004 - The radical growth of the Owner-Operator Trucking industry has created a need for a full service business-side of Trucking, service provider company that will allow Owner-Operator and small fleet owners to access big business Revenue Cycle management services with just one phone call.

To meet this need in the trucking industry, BPM today broke new ground by announcing the formation of Trucktax.ca, and Trucktax.com the industry's first nationwide Revenue Cycle business support services company for Owner-Operators and the Trucking Industry.

Operating as a separate enterprise, Trucktax.ca is will fundamentally change the way Owner-Operators (Truckers) and Small Fleet Owners in the Trucking Industry handle their business-side of Trucking compliance management functions:

Trucktax.ca will be the cost-effective outsource back-office for handling all the services that drive the business-side of trucking. From, Credit and Collections of freight bill, to Bookkeeping and Tax Reporting, Fuel Tax, IFTA and Road Tax reports preparation and accounts payable processing.

As stated by many of our Owner-Operator clients, the paperwork demands of business-side of trucking consumes a large portion of their time and their ability to focus on Trucking-for-Profit

In addition, truckers are not MBAs, yet in an industry poised for significant growth, before Trucktax.ca, there were no one-stop business support service available for these new entrepreneurs. Yet, this industry is undergoing significant growth brought on by the increasing high cost of fuel and other operating expenses and the move by large trucking companies to convert their employee fleet of drivers to Independent Owner-Operators so as to reduce their operating cost and improve the bottom-line.

Our survey indicates that the business failure rate in this group is significant, due to the inability of a good truck driver to suddenly become a master at managing the business-side of trucking. Result, they wind up ignoring business and government compliance requirement, have no financial reporting system to tell them if their trips are profitable and soon become history and everybody loses.

At Trucktax.ca we know the business-side of trucking and our mission is to help more truckers drive more profit to their business bottom-line, by providing the Owner-Operator and Small Fleet trucking industry with competitively-priced business-side of Trucking services, designed to reduce the cost of accessing these services from multiple service providers and in-house employees.
