

Elgin Volkswagen provides online information on the benefits of buying versus leasing a vehicle

Individuals may learn whether leasing or purchasing is better for them with help from local dealership

ELGIN, Ill. ([PRWEB](#)) February 20, 2020 -- Those curious about the comparative drawbacks of buying and leasing a car can find helpful information on a webpage provided by Elgin Volkswagen, a dealership servicing Elgin, Illinois, along with the entire surrounding area. [The page features](#) an easy-to-read chart graphic that contrasts key differences between buying and leasing. These differences illustrate that there are benefits and drawbacks to both, with the conclusion being that one should ultimately choose based on their own unique life situation and goals.

To briefly summarize a few of the main points, buying is beneficial for the customer who prioritizes true ownership of a car and wishes to do as they please with it (within legal limitations). Buyers are free to drive their vehicle as they wish and customize it if they desire. They won't have to answer to an owner regarding dings, scratches or other damage.

A lessee, on the other hand, is merely renting a vehicle. They are almost always limited in the number of miles they may drive each year, exceeding which results in additional charges. They also cannot customize the vehicle without the permission of the owner and will have to compensate for any damage they cause. Lessees do typically get to enjoy lower monthly payments and down payments than owners. The lease system also keeps them driving new models.

Those interested in buying or leasing a new vehicle are encouraged to head to the Elgin Volkswagen website at www.elginvw.com as soon as physically possible. Those attracted to the prospect of utilizing their vocal cords can make a phone call to 877-797-6424. Finally, individuals may also head straight to the dealership's physical location, where they can see and experience the vehicles on offer in-person, at 2630 Auto Mall Drive, Elgin.
