

Toyota Drivers Can Find High-Quality Spring Season Preparation Service at Gale Toyota

Dealership's In-House Service Center Can Help Drivers Get Their Toyota Vehicle Ready for Spring

ENFIELD, Conn. ([PRWEB](#)) March 29, 2020 -- After a long and cold winter in Connecticut, it is imperative that drivers get their vehicle ready for the spring season. To help Toyota drivers make sure their vehicle is dependable during the unpredictable spring season, Gale Toyota offers an in-house service center that can provide preparation maintenance.

The service technicians at Gale Toyota are specially trained to know the architecture and personality of each Toyota vehicle to ensure high-quality service. During the spring season, some of the most frequent maintenance tasks that the service technicians perform are oil changes, testing the battery, switching out specialty snow tires for a summer style and inspecting the undercarriage for premature corrosion caused by snow and salt. The technicians can also clean or replace the air filters in the cabin to prevent springtime pollen and other allergens from entering the vehicle.

To help make the vehicle maintenance process even easier for drivers, Gale Toyota now offers a vehicle pick-up and drop-off service. To learn more about this option, drivers are encouraged to contact a service advisor at Gale Toyota at 860-253-3363.

Drivers who are interested in learning more about maintenance services available at Gale Toyota are encouraged to contact the service center by phone or by visiting the dealership's website at www.galetoyota.com and scheduling a service appointment. Gale Toyota is located at 50 Palomba Drive in Enfield.
