

The all-new Scion tC comes equipped with a ton of options and, most notably, the support of the newest online automotive community, YourScionTC.com.

It just came out and it already has a huge following! The much anticipated release of the Scion tC is on the minds of many automotive enthusiasts. Now they have a community-based web site, YourScionTC.com to call home.

Auburn, CA ([PRWEB](#)) June 25, 2004 - YourScionTC.com has been launched in response to the recent release of the much anticipated Scion tC! The tC is the latest car added to the Scion lineup, in addition to the xA and xB models. The tC is considered, by many, as the replacement to the Toyota Celica.

With the Scion tC, you're getting more for your money. With 160 horsepower and 163 lb.-ft. of torque, and other attributes, it will outperform the Celica, and it will do so at a lower price. Other benefits of buying a Scion tC include standard features like power door locks and windows, a panoramic moon-roof, four wheel disc brakes, 17" alloy rims, a Pioneer stereo audio system and many more items.

There are also a wide range of options available from Toyota Racing Development, or TRD, such as a supercharger, exhaust, 18" wheel and tire package, performance clutch, lowering springs and more! Thanks to the foresight of Scion, consumers will be able to customize their new tC before it's driven off the lot.

Before purchasing any car, people will want to research and find out as much as they possibly can about it and just about anything having to do with it. Because the car was just made available to the public, there weren't any sites devoted entirely to the tC to speak of. With a web site like YourScionTC.com, owners and enthusiasts can learn more about the car, discuss anything having to do with it, find support for maintenance and repair needs, share pictures and much more.

For additional information contact the owner/webmaster, Eric Kloss at the following address, or by email at webmaster@yoursciontc.com.
