

## **STR Software Wins Contract from Summit Racing Equipment to Migrate Automated Faxing System**

*STR Software landed a new contract with Summit Racing Equipment in Tallmadge, Oh. STR Software will implement AventX UNIX, an electronic information delivery software product for faxing documents from Unix operating systems.*

RICHMOND, VA ([PRWEB](#)) July 28, 2004 -- STR Software landed a new contract with Summit Racing Equipment in Tallmadge, Oh. STR Software will implement AventX® UNIX, an electronic information delivery software product for faxing documents from Unix operating systems. The company will also employ AventX WebManager to monitor and manage the delivery of documents over the Web. Summit Racing Equipment, a longtime user of STR Software's AventX MPE products for faxing automatically from MPE operating systems, plans to migrate its current automated faxing systems to a Unix environment.

STR Software of Richmond, Va., develops, markets and supports software products in electronic information delivery for host ERP applications like Oracle E-Business Suite, PeopleSoft and SAP. The company provides fax, email and internet fax software solutions for Linux, Unix, MPE and Windows environments. For additional information, visit [www.strsoftware.com](http://www.strsoftware.com).

Summit Racing Equipment is the world's largest mail order and online supplier of high performance automotive parts. For more information, visit [www.summitracing.com](http://www.summitracing.com).
