

Yellow Ribbon Magnets Now With Custom Messages And A Photo Of Your Soldier

The yellow ribbon magnets you've seen on cars now can include a photo of your soldier and personalization. Designs on Demand will customize your magnet or create the same design as a window sticker.

([PRWEB](#)) August 6, 2004 -- Yellow ribbon magnets are on vehicles everywhere and signify that we support our troops. Now supporters can go one step further and personalize their magnet with a custom message and a photo of their soldier.

Designs on Demand is introducing yellow ribbon magnets with personalized messages at the top and each end of the ribbon, and the soldier's photo or insignia within the ribbon loop.

"We believe we are the first to offer this customization to families and supporters of the military," said Margaret Scheperle, graphic designer at Designs on Demand. "Our custom photo dog tags have received tremendous response and are worn by soldiers in the field and also by loved ones at home. The addition of photos to yellow ribbon magnets is a natural extension of showing that support and love while they are away."

Personalization has included messages such as "My Brother, My Hero," the soldier's name and unit, and the crests of special ops units. Any photo or crest can be displayed.

The yellow ribbon magnets are available in 3 sizes and with or without a flag background. They are also available as a sticker for displaying on a window. They are offered at \$7 for a 4" magnet to \$10 for an 8" magnet.
