

Bumperbib Inc. In negotiations with Manufacturers in Mexico and Vietnam for producing the bumperbib.

Bumperbib Inc. is currently negotiating with Tranh Thanh in Vietnam, and Cecy in Mexico to begin full production of the bumperbib with target shipment dates of 9/5/2004

([PRWEB](#)) August 20, 2004 -- Bumperbib Inc. is currently negotiating with Tranh Thanh in Vietnam, and Cecy in Mexico to begin full production of the Bumperbib with target shipment dates of 9/5/2004

Bumperbib Inc. has just completed sampling, and first round talks with these companies, and are finalizing negotiations with regards to price, and volume quantities.

The Bumperbib is a Nylon vehicle accessory designed to protect a vehicle from scratches when loading/unloading cargo. In addition, the Bumperbib protects the car owner from getting dirty reaching into cavernous cargo areas such as SUVs and Minvans.

"We are excited to be at this juncture. We have established dual distribution channels to ensure prompt delivery of the Bumperbib to our customers.", stated Eric Stevens, CEO of Bumperbib Inc.

During the last year we have been working with our attorneys to ensure the Patent process with the USPTO. During such time we have been proactively submitting prototypes to vendors and media to increase brand awareness.

The Bumperbib is a Nylon vehicle accessory designed to protect a vehicle from scratches when loading/unloading cargo. In addition, the Bumperbib protects the car owner from getting dirty reaching into cavernous cargo areas such as SUVs and Minvans. Statements made in this release are forward looking statements. There is no guarantee to shareholders that Bumperbib Inc. will increase profitability via these actions.
