

## **Custom Chassis Unveils New Mid-Sized, Mid-Engine Diesel Motorhome Chassis At Dusseldorf Caravan Show.**

*Custom Chassis, Inc. today introduces its new European mid-engine motorhome chassis at the annual Caravan Salon in Dusseldorf Germany. This new mid-sized, diesel chassis has allowed Teschner Motorhome Manufacture to create a garage model motorhome able to transport small automobiles inside the back of the motorhome.*

WELLINGTON, OH ([PRWEB](#)) August 27, 2004 - This mid-sized Prairie chassis line incorporates a Cummins ISBe Euro 3 emission engine, Allison 1000 series automatic transmission, Westport and Dana axles and Ridewell multi-link front and rear air suspension. Other features include an engine controlled cooling system fan, convenient single-point service area, steering wheel mounted cruise and a windshield wiper control and a integral HWH air leveling system. With the engine mounted forward of the rear axle, but yet far behind the driver all the benefits of a rear engine chassis are retained with the added benefit of rear garage floor plan.

Teschner Motorhome Manufacture of Brehna, Germany and Elkhart, Indiana has incorporated this chassis into their new line garage model motorhomes displayed at the show.

This chassis represents a significant step forward in the evolution of the mid-sized diesel motorhome, said Matt Tipple, President of Custom Chassis. Previously only front engine and more recently rear engine chassis were available. With the rear of the chassis completely open the possibilities are endless as to the large items that can be safely carried inside the motorhome.

Custom Chassis, Inc. ([www.customchassisinc.com](http://www.customchassisinc.com)) is a manufacturer of custom motorhome and bus chassis. They specialize in chassis to meet the requirements of the European market. The company strives to engineer and build a high quality product to meet the customer's needs.
