

PartsRiver Named to "100 Great Supply Chain Partners" List

PartsRiver Inc., the leading provider of data quality and analytics services for the transportation equipment industry, today announced that it has been selected as one of the "100 Great Supply Chain Partners" by Global Logistics and Supply Chain Strategies (GL&SCS).

Menlo Park, CA ([PRWEB](#)) August 30, 2004 -- PartsRiver Inc., the leading provider of data quality and analytics services for the transportation equipment industry, today announced that it has been selected as one of the "100 Great Supply Chain Partners" by Global Logistics and Supply Chain Strategies (GL&SCS).

GL&SCS received nominations of over 2,000 global companies representing five continents whose technology, logistics, transportation or consulting solutions have made a significant impact on overall supply-chain performances. PartsRiver was chosen to the top 100 list based on customer input, industry expertise and the ability to understand and solve the specific supply chain challenges and business issues relating to data quality and analytics.

"We are excited to have been selected as a top supply chain partner," said Elisa Jagerson, CEO of PartsRiver. "This is a particular honor because this list was driven by customer nominations. Inclusion on this list is validation of PartsRiver's ability to deliver leading edge data quality services that have immediate and sustainable value to our customers. We will continue to answer the call of our market by delivering solutions that generate immediate and dramatic savings by leveraging data quality for strategic business decision making."

In its report, GL&SCS explains one story of a PartsRiver customer. "The group manager of maintenance for one of the largest truck rental companies in the world credits PartsRiver for providing knowledge, data, system capacity, and proprietary search engines, enabling the reduction of redundant part numbers used to purchase repair parts by a factor of six. The normalization of SKUs enabled target pricing and target sourcing resulting in a 9.7 percent reduction in parts acquisition cost, netting more than \$10m in savings."
