

Gas and oil Prices Too High?

Clean your entire fuel system with Fuel Power. Reduce oil oxidation with Lube Control. By using these products you will reduce emissions and potentially increase your gas mileage.

([PRWEB](#)) October 18, 2004 -- Keeping your fuel system clean and maximizing the life of your cars oil can greatly reduce cost, which we all need when oil is over \$50 a barrel.

Lube Control and Fuel Power are two innovative products that remove carbon and varnish build up and keep it from coming back. Lube Control will prevent oil from oxidizing which causes the harmful carbon and varnish. If you can keep your oil from oxidizing you can run it well past 3,000 miles.

Fuel Power will clean your entire fuel system and keep it clean. Fuel Power can be added to gasoline and diesel fuels and by reducing carbon and varnish you will reduce black smoke and harmful emissions.

These products have been in use for over 40 years by cities and school districts and are now being packaged and marketed toward the general public.

There are no other products like these on the market today. For further information please read up at <http://www.lubecontrol.com> and also at the best known independent oil forum on the internet
