

AutoMotion Introduces Remote Purchasing “Find For Me” Feature For Automotive Shoppers

New AutoMotion app-based beta technology pairs consumers with remote purchasing options in their area

SAN FRANCISCO ([PRWEB](#)) April 04, 2020 -- Today AutoMotion, the leader in mobile app technology for automotive retail, announced the launch of a new beta feature to its platform that helps pair car shoppers with safe purchasing options in their local area. The new feature, “Find For Me” helps shoppers locate and buy vehicles available for remote purchase.

With more consumers looking for remote buying options, AutoMotion is offering its users a way to find, test drive, and purchase a vehicle without visiting a retail dealership. The program’s initiative pairs consumers needing mobility in uncertain times with a contactless purchase alternative.

Users today will find the new Find For Me option in the app “Cars for Sale – AutoMotion”. The AutoMotion platform identifies physical and online dealerships in the user’s area ready to provide remote purchasing and provides all needed communication between the user and the dealer during the process. AutoMotion is leveraging its dealer base to connect consumers needing mobility with safe, convenient ways to acquire needed transportation.

The AutoMotion suite of apps now features millions of app-based car buyers and owners. AutoMotion connects in-market consumers with participating dealers to help facilitate car buying and servicing needs.

AutoMotion is a free platform for consumers available on the Apple App Store and Google Play Store. For more information on AutoMotion, please visit <http://www.automotionapp.com>.

About AutoMotion:

AutoMotion simplifies the process for consumers looking to buy, lease, or subscribe to their next vehicle. AutoMotion is the fastest growing suite of consumer-focused automotive apps for the App Store and Google Play store. The AutoMotion network includes over 3,500 approved franchise dealerships. Dealers on the AutoMotion network provide AutoMotion shoppers and owners a simplified, app-based, personal experience tailored to their individual requirements.
