

Havis Releases Slimmer Docking Stations for Dell Latitude 12 Rugged Tablets

Havis expands its full line of docking stations to maximize space in mobile offices requiring a slimmer footprint

WARMINSTER, Pa ([PRWEB](#)) May 08, 2017 -- Havis Inc., a leading manufacturer of mobile office solutions, has added the DS-DELL-610 Series of thin-profile docking stations to its full line of lightweight docking stations and cradles for Dell Latitude 12 Rugged Tablets. The thin-profile docking station is designed to maximize space inside a vehicle, forklift, work cart or on a desktop, for a more productive mobile office. The DS-DELL-610 Series will be on display at Dell-EMC World booth # 652 May 9-11 in Las Vegas, along with several other docking options for Dell Computing devices.

The DS-DELL-610 provides a reliable and compact solution for securing devices and connections to peripherals in rugged conditions. The docking stations include port replication to allow for connectivity to printers, scanners and other peripherals, with up to two USB 3.0 cable ports, and one USB 2.0 port in the front, as well as Ethernet, serial, VGA and display port replication. Bundled power supply options are also available.

The docking station is ergonomically designed with rounded corners and edges to maximize safety and comfort, and tested to the industry's highest safety standards to ensure quality performance in the most rugged conditions. The new DS-DELL-610 Series can be combined with Havis' broad selection of mounting and motion accessories to be integrated into a variety of in-vehicle and desktop applications.

Havis works directly with OEM partners like Dell to develop computing device-specific docking stations that are ergonomically designed to maximize safety and comfort. Havis docking solutions are tested to the industry's highest safety standards to ensure quality performance in the most rugged conditions.
