

## **Auto Leasing Deal or Dud the ongoing question.**

*After Researching Automobile Market. Texas Car Dealers are moving full speed ahead with the launch of its latest division - Park Cities Auto Leasing. A Recent survey is showing that almost 35 percent of the people are leasing there cars and it only looks as if it is on the rise.*

Dallas, TX ([PRWEB](#)) December 4, 2004 -- We Have found most people are happy with there lease and will only do so now on. With most leasing companies having a 70 percent return on clients how could you ignore that?

No, leasing is not for everyone. We will be the first to point out that leasing doesn't work for everyone but' Maybe more than one would think. With so many people returning to leasing it tells us it's a "deal" and we have decided to invest in it.

"We are very pleased to get this Company up and running," said managing partner David Thomas of Subaru of Dallas. "(It) was part of our overall plan from the start."

During its first two weeks, Park Cities Auto Leasing did almost \$500,000 in leases, says Mr. Thomas. The division which specializes in leasing a variety of luxury cars, SUV and corporate lease programs.

"The leasing market is good, especially on the luxury end," Mr. Thomas said. "This has been a very appealing concept for many people".

We had to join forces with many groups to produce the sophisticated software technology that allows the company to quote lease prices from hundreds of different lease programs.

Park Cities Auto Leasing is not a car dealer it is more like a financial consultant group for Automobiles. Park Cities is open from 8am to 8pm Monday through Saturday. Contact Info [www.parkcitiesautoleasing.com](http://www.parkcitiesautoleasing.com) (Auto Leasing)
