AplusB Software Corporation, Game Developer, Releases Commercial Driver's License Manual, Windows Educational Toy for Professional Driver

AplusB Software Corp. leader in Road Safety Applications, announced the launch of educational toy for professional driver Commercial Driver's License Manual. It is a first interactive application, covering all aspects necessary for potential truck and bus drivers in North America. Even do, each year 100 000s people in US obtain Commercial Driver's License it is still not enough to satisfy market; in the next few years American society will face shortage of 3 millions truck drivers. Based on the facts that computer is the most preferable (effective) method of study and student can study (practice) it at any time and anywhere, producer developed this friendly game to solve future transportation problems.

OTTAWA,Ontario ([PRWEB](#)) December 22, 2004 -- The Commercial Driver's License Manual is designed for truck, bus, and other commercial operators. Beside general information and questions, software incorporates endorsements such as: Air Brake, Double/Triple, Combinations, Hazardous Material, Tank, and Passengers. Moreover, it explains step-by-step Pre-Trip inspection, gives details about Road Test, and contains many other necessary information for professional truck/bus drivers on the road. This educational toy is all driver needs to get a professional driver's license and drive safely across continent. Game is distributed by License Offices, Driving Schools, and online stores.

There is no software installation required and CD-ROM can be used on any computer with a Windows platform. The Commercial Driver's License Manual has very friendly interfaces, does not expire, and can be updated from AplusB Software Corporation website. Game is protected against copying and its price is accessible to people from all walks of life. This educational toy can be used independently or as an addition to books and lectures; it is dedicated for student but it can also be used by instructor who does lecture presentation. As an addition each CD-ROM contains the US & CANADA DRIVING TEST, a multi languages application preparing beginner driver to pass their first official government theory & road test in one of 51 states and 12 provinces.

Application was made in cooperation with Truck/Bus Driving Schools in New York City and Toronto. In Summer 2004 AplusB Software Corporation extensively tested contents and efficiency of this educational toy in real world, to ensure its high quality. AplusB Software Corporation ensures that students who sufficiently practiced Commercial Driver's License Manual will be fully qualified to pass state/provincial Commercial Driver's License exam and will drive safely. Manufacturer conducted research and determined that unemployed people and transportation industry have serious needs for such Educational Toy. Company goal is to give an opportunity to become commercial driver to those unemployed people who live far from the CDL schools.

Based on years of experience in software development and road safety issues, AplusB Software Corporation created the game that provides the necessary training for future truck and bus drivers.

· The program includes all necessary information to get CDL (Commercial Driver's License).
· Student has choice of study or can take interactive exam with appropriate feedback and saved scores.

Â·   Software supports updated links to all Departments/Ministries of Transportation web pages where recent information are available, maps, driving directions, weather and road conditions.

Â·   One part of the application with advises and hints is dedicated to these students who practice driving skills and are ready for Road Test.

AplusB Software Corporation (D&B D-U-N-S #205560118)
Initiated in 2002 as a Â□BIP SoftwareÂ□ and incorporated in 2003 as a Â□AplusB Software CorporationÂ□. Offering high-quality and low-cost educational software company increases road safety and decreases unemployment rate in rural areas.
