Swansea ([PRWEB](#)) December 27, 2004 -- While online shoppers are looking for the right Auto Parts for their vehicle, many may find it difficult and not know where to go or look because there are so many options.

That's why Glenn Sarault, owner of SunBright Publishing, launched <http://2nd-to-no-1-in-auto-parts.com> this week. "There are so many companies and so much information out there that can make it difficult to shop for Auto Parts. But at <http://2nd-to-no-1-in-auto-parts.com>, we've done all the work so our customers don't have to," Sarault said.

Sarault features individually selected companies on the Web site that provide a large selection of name brand, high quality products, dedicated customer support and expert information. Sarault researches and tests Auto Parts companies and posts the better-quality companies on <http://2nd-to-no-1-in-auto-parts.com>. The company review process includes examining each company's attention to detail and the feedback from each company's visitors.

The Web site also provides customers with articles that provide tips and information about the types of Auto Parts they are looking for. For example, Looking for Discount Auto Parts?

Like practically every other form of shopping, the quest for discount auto parts breaks down into two basic arenas. Reasonable and really cheap. Which way you go will depend on how much mechanical skill you're starting out with. And you do have some, or you'd go to the dealer for every little noise under your hood right? Just remember, the bargain shopper takes on every mission with equal parts confidence and caution.

### **The Retailer**

Whether walking into a family owned discount auto parts store or one of the nationwide chains or even shopping online, you can discard all the buzzwords (OEM, remanufactured, aftermarket). You should instead focus- from a "strictly business" standpoint- on who you're dealing with. How many years, better yet decades, has the retailer been in business? Does every part come with a lifetime warranty? If you require labor, is there a guarantee in writing? Should you deal with a retailer who can't meet these basic requirements here's a guarantee in writing: you will be sorry later.

### **The Recycler**

Better known as the junkyard, the other side of the discount auto parts coin. The expression "Let the buyer beware" was likely invented here. But if you're mechanically inclined and educated enough about your own car, a trip to the local junkyard, er, recycler is practically a steal. Large percentages of recyclers actually salvage and sort car parts for the purpose of re-selling them at below rock-bottom prices. Refunds will be another story! according to the Web site.

Other advice and helpful information about Auto Parts, Auto Body Parts, Auto Repair, Car Accessories, Car Parts, Discount auto Parts and Used Auto Parts can also be found on <http://2nd-to-no-1-in-auto-parts.com>.

“We've taken the time to shop around and help narrow down your many choices in Auto Parts. You'll be happy with your connection to select companies that also feature outstanding Car Accessories and Used Auto Parts to help you affordably maintain your vehicle,” Sarault said.
