PlateSmart Recognized with Fifth Govies Award

Powered by PlateSmart earns company recognition in video analytics category

OLDSMAR, Fla. (PRWEB) March 07, 2020 -- Security Today magazine recently announced the 2020 winners of its annual Govies Government Security Awards competition, with PlateSmart Technologies being recognized for its Powered by PlateSmart product in the video analytics category. It is the fifth time the company has won a Govies award in that category.

"Powered by PlateSmart provides OEMs the opportunity to easily and cost-effectively add cutting-edge AI- and deep learning-based ALPR (automatic license plate recognition) and vehicle recognition technology to their business applications," said John Chigos, CEO, PlateSmart. "It's ideal for OEMs serving government, military and homeland security markets. We're grateful to Security Today for recognizing the excellence we bring to our ALPR and vehicle recognition products."

PlateSmart earned its first Govies award in 2014 — a platinum award for its PlateSmart ARES ALPR solution. It earned consecutive Govies through 2017:

- 2015: platinum award, video analytics, for PlateSmart ARES high-definition (HD) ALPR engine
- 2016: platinum award, video analytics, for PlateSmart Network
- 2017: platinum award, video analytics, for PlateSmart ARES Insight

This latest award marks the fifth time the company has been recognized.

"Once again, PlateSmart has been recognized for being market leaders in license plate and vehicle recognition," Chigos said. "The marketplace has evolved, but the mark we made upon it as the original software-only ALPR solution is clear. We look forward to future Govies awards and the chance to be honored again for our market leadership."

In announcing winners, Security Today said that Govies gold and platinum designations would be announced at ISC West, which is being held March 18-20 in Las Vegas.
