Date: February 13, 2006

Subject: Upcoming Noncompliance Recall  
06009 - Vehicle Certification Label, Tire & Loading  
Information Label and Vehicle Identification Number

Model: 2006 Chevrolet Uplander Cargo Van

To: All Chevrolet Dealers

Attention: Dealer Operator, General Manager, Sales Manager,  
Used Car Manager, Service Manager, Parts Manager  
and Warranty Administrator

Based on information from the National Highway Traffic Safety Administration (NHTSA) web site, the media may report that General Motors will be announcing a noncompliance recall involving certain 2006 Chevrolet Uplander Cargo Vans.

These vehicles fail to conform to either Federal Motor Vehicle Safety Standard 110 or 120 - Tire Selection and Rims. The vehicles do not have a tire and wheel information label because they were incorrectly designated as incomplete vehicles. For the same reason, GM did not install a complete vehicle certification label and the vehicles have a Vehicle Identification Number (VIN) with a GM designation for an incomplete vehicle.

To correct this condition, GM will send corrected labels to affected customers for self-installation and to involved dealers for installation in vehicles currently in their inventory. Customers will also be provided the option of taking their vehicle to a dealer for installation of the labels. Dealers will perform this repair at no charge to customers.

GM will also send a letter to the National Insurance Crime Bureau identifying the VIN anomaly for the suspect vehicles.

A total of 291 vehicles are involved and GM is working with its supplier to obtain the replacement labels as quickly as possible. Dealers will be advised when a release date has been established for this recall.

GMVIS information for this recall will not be available until the recall bulletin is released to dealers.
