**IMPORTANT SAFETY RECALL REMINDER**

Ford Motor Company would like to remind you that your 2004 F-150 Ford Truck needs to have the following no charge recall(s) completed.

You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

**Recall Number 11S18 - Air Bag Wire Harness Replacement and Description:**

**What is the Issue:** On your vehicle, it may be possible for the clockspring to driver side frontal air bag wire harness to chafe on the horn mounting plate. Chafing of this wiring harness may cause the driver side frontal air bag to inadvertently deploy which presents a risk of injury from the deployment of the air bag and/or a loss of vehicle control. This chafing may also cause the air bag warning lamp to illuminate in the instrument panel indicating service is required immediately. The air bag warning lamp should never be ignored - it can indicate that the airbag may deploy inadvertently or that it may not deploy in a crash.

**What Are We Asking You To Do?** Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access [www.Fordowner.com](http://www.Fordowner.com) for dealer addresses, maps and driving instructions.
