**SECTION 1**  
**PURPOSE OF COMPLIANCE TEST**

Tests were conducted on a 2008 Collins Grand Bantam School Bus, NHTSA No.: C80900, in accordance with the specifications of the Office of Vehicle Safety Compliance (OVSC) Test Procedure TP-111SB-00 to determine compliance to the requirements of Federal Motor Vehicle Safety Standard (FMVSS) 111SB, "School Bus Rearview Mirrors."

This program is sponsored by the National Highway Traffic Safety Administration (NHTSA), under Contract No. DTNH22-08-D-00075.

**SECTION 2**  
**TEST DATA SUMMARY**

Based on the tests performed, the 2008 Collins Grand Bantam School Bus, NHTSA No.: C80900, appears to meet all of the requirements of FMVSS 111SB. See Test Summary Data Sheets on the following pages.

6	CONVEX	A	N, O, P

Cylinders visible by direct view: A, B, C

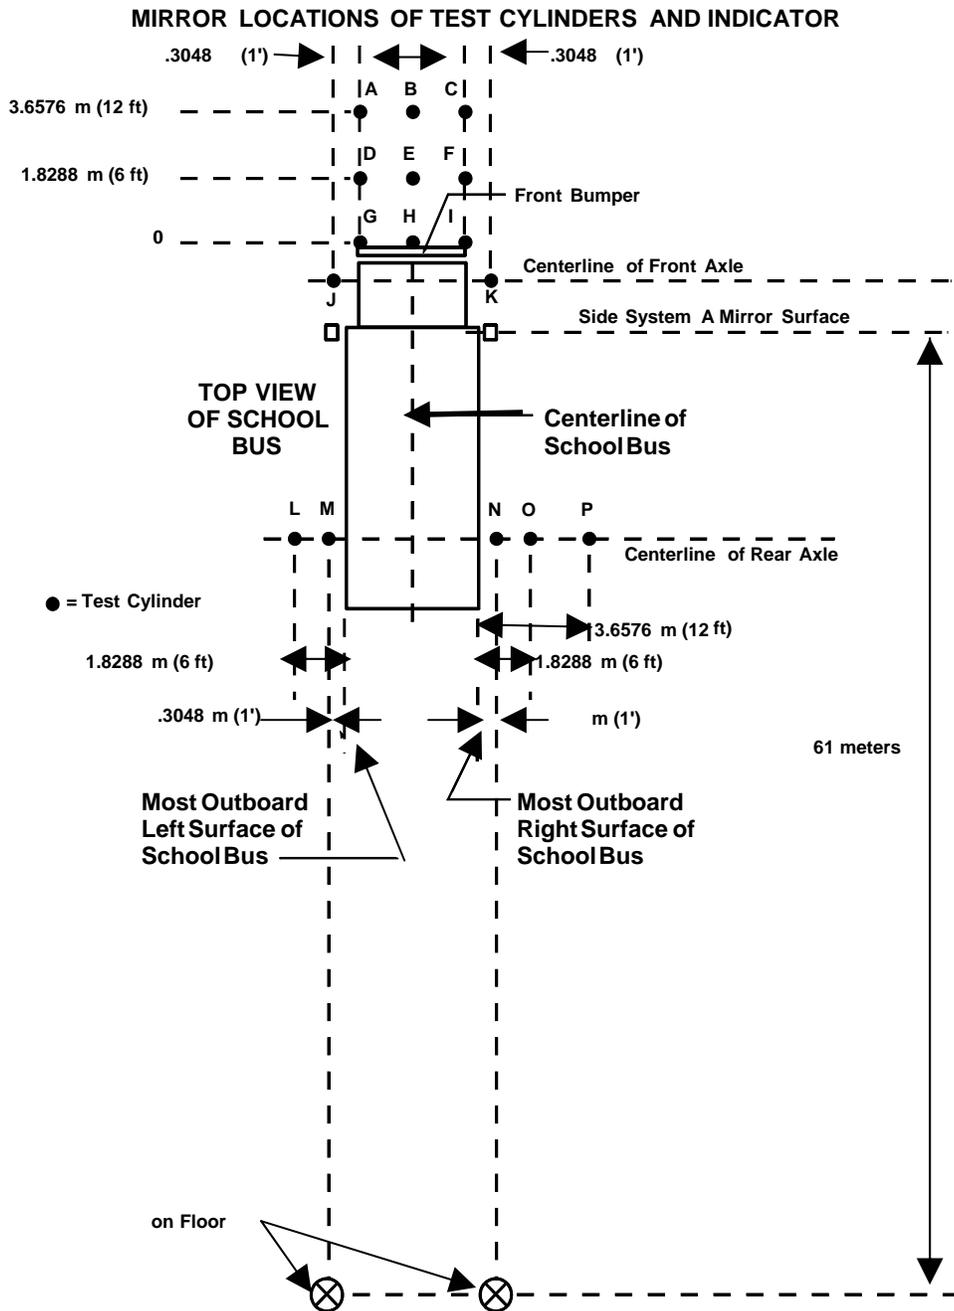

SEE FIGURE ON NEXT PAGE

FMVSS 111SB - DATA SHEET 2...continued

MIRROR LOCATION AND FIELD OF VIEW

Test Vehicle: 2008 Collins Grand Bantam School Bus  
 Test Lab: MGA Research Corporation

NHTSA No.: C80900  
 Test Date: 1/5/2009 – 1/12/2009

- NOTES:
1. The cylinders shall be a color which provides a high contrast with the surface on which the bus is parked (S13.1).
  2. The cylinders are 0.3048 m high and 0.3048 m in diameter, except for cylinder P which is 0.9144 m high and 0.3048 m in diameter.

**FMVSS 111SB - DATA SHEET 2...continued**

**MIRROR LOCATION AND FIELD OF VIEW**

Test Vehicle: **2008 Collins Grand Bantam School Bus**      NHTSA No.: **C80900**  
 Test Lab: **MGA Research Corporation**                      Test Date: **1/5/2009 – 1/12/2009**

**SYSTEM A AND DIRECT VISION**

System A Mirrors	Pass/Fail
Entire top surface of cylinder N and the indicator 61 meters (200 feet) rearward of the mirror surface can be viewed in the photograph	<b>Pass</b>
Entire top surface of cylinder M and indicator 61 meters (200 feet) rearward of the mirror surface can be viewed in the photograph	<b>Pass</b>
Which test cylinders A through P can not be photographed directly from the driver's eye location within the semi-circle viewing area using no mirror system:	D, E, F, G, H, I, J, K, L, M, N, O, P

**SYSTEM B ARC'S AND DISTANCE**

Mirror Number (from data sheet 2)	Mirror Location	Distance from the Driver's Eye Point to the Center of the Mirror (cm)	3 Minutes of Arc (cm)	9 Minutes of Arc (cm)
#1	1	215.6	0.19	--
#2	2	261.7	0.23	0.69

Distance determined in column 3 multiplied by 0.000873 yield 3 minutes of arc, for column 4, for that mirror as viewed from the driver's eye point; the distances determined in column 3 multiplied by 0.002618 yield 9 minutes of arc, for column 5, for that mirror as viewed from the driver's eye point. The minimum distance for any system B mirror between the driver's eye point and the center of the mirror is more than 95 centimeters (37.5 inches):

	Distance	Pass/Fail
Distance between center of System B mirror #1 and driver's eye point	215.6 cm	<b>Pass</b>
Distance between center of System B mirror #2 and driver's eye point	261.7 cm	<b>Pass</b>

Recorded By:       Brian Road

**FMVSS 111SB - DATA SHEET 3**

**FIELD OF VIEW TEST – PHOTOGRAPHS System B**

Test Vehicle: **2008 Collins Grand Bantam School Bus**      NHTSA No.: **C80900**  
 Test Lab: **MGA Research Corporation**                      Test Date: **1/5/2009 – 1/12/2009**

		Pass/Fail
All test cylinders with entire top surface not directly visible from the driver's semi-circle eye location are able to be viewed with System B mirrors from the driver's semi-circle location:		<b>Pass</b>
All test cylinders with entire top surface not directly visible from the driver's semi-circle eye location but the image can be viewed with System B mirrors. The image is separated for the edge of the effective mirror surface of the mirror providing that image by a distance of not less than 3 minutes of arc:		<b>Pass</b>
If the entire top surface of test cylinder P is not directly visible from the driver's semi-circle eye location, the image can be viewed with System B mirrors from the driver's semi-circle eye location, where the angular size of the shortest dimension of that cylinder's image is not less than 3 minutes of arc, and the angular size of the longest dimension of that cylinder's image is not less than 9 minutes of arc:		<b>Pass</b>
Shortest arc length dimension	0.16 cm	
Longest arc length dimension	0.59 cm	
For each of the test cylinders whose entire top surface is not directly visible from the driver's eye location, System B provides a view of the ground that overlaps with the view of the ground provided by System A.		<b>Pass</b>
