The recall tires were manufactured at our plant in Sendai, Japan (CX) and in Kuwana, Japan (N3) and can be identified by examining the sidewall stamping for the Brand, Model, Size, the “Made in Japan” mark, and the Tire Identification Number (“TIN”), which includes the plant code (i.e., immediately following the “DOT” mark), and the manufacture date (i.e., last 4 digits of the TIN).

The illustration below will assist you in locating the tire information on the sidewall.

Brand and Model Name: “OPEN COUNTRY” “TOYO H/T” “TUFF DUTY”

Note: Please be sure to check your spare tire as well.

If you have difficulty determining whether you own a recalled tire, please contact or visit your Toyo dealer for assistance.

WHAT IS THE PROBLEM?

In a small number of these recall tires, production variances in the belt package during the relevant production periods may have created conditions that may put undue stress on the belt edge. If undetected, this condition may potentially contribute to a tread/belt separation and/or loss of inflation pressure, which may increase the risk of tire failure and a vehicle crash.

REPLACEMENT OF RECALLED TIRES

If you own a recalled tire, please contact the dealer from whom you purchased the tire, or your nearest authorized Toyo dealer, to schedule an appointment to replace the tire. Replacement tires are readily available, and in the event that your dealer does not have them in stock, replacements will be ordered for you. The recalled tire will be replaced free of charge, including mounting, balancing and taxes, if returned to the dealer from whom you purchased the tire, or an authorized Toyo dealer, on or before March 1, 2015. Please take this letter to the dealer at the time of your appointment.
