

## **InventHelp Inventors Develops Improved Camera System for Police Cars (KSC-1082)**

*A leading invention submission firm, InventHelp is submitting the MOBILEYES to appropriate companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 30, 2015 -- "As a police officer, I wanted to be protected in the event that something went awry during an altercation, especially after the tragic events in Ferguson, Missouri," said one of two inventors from Fort Scott, Kan. "This camera system would help safeguard both officers and the public by ensuring that a video record of the event was available for review."

They developed the MOBILEYES to provide a video record of a traffic stop. The system ensures that the events can be reviewed should an altercation take place. It is designed to protect both officers and the public. The system helps reduce the incidence of false accusations. This offers added peace of mind. Furthermore, the invention is more versatile than other camera systems.

The original design was submitted to the Kansas City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-KSC-1082, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
