

## **New at Summit Racing Equipment: Trailer Gear to Safely Transport Race Cars and Other Vehicles**

*Race cars, classic cars, and off road-only vehicles are usually trailered to and from races and events. Summit Racing offers the latest gear to help racers and car owners secure their valuable vehicles for safe transporting.*

Tallmadge, OH ([PRWEB](#)) February 19, 2016 -- Race cars, classic cars, and off road-only vehicles are usually trailered to and from races and events. Summit Racing offers the latest gear to help racers and car owners secure their valuable vehicles for safe transporting.

### [Mac's Chassis Stabilizers and Net Drag Packs](#)

Mac's Chassis Stabilizers are designed to limit unwanted chassis flex caused by a bouncing trailer. After loading the car, simply slide the stabilizer under the most flexible point of the chassis and inflate. The stabilizer will support some of the weight of the racecar and minimize the vibration, bounce, and shock caused by rough roads. Designed specifically to fit large drag slicks, Mac's Rear Net Drag Packs wrap tightly around each rear wheel and secure to floor mounted D-rings to prevent the car from moving on the trailer.

### [Race Ramps Trailer Ramps](#)

Race Ramps Trailer Ramps mitigate the headache of loading a low vehicle by decreasing the trailer's approach angle to as little as four degrees. They're an absolute must-have for vehicles with an exceptionally low ride height or a low front lip spoiler. Sturdy and lightweight, the ramps are made from foam material similar to that used on the Space Shuttle.

### [Summit Racing Tie-Down and Axle Strap Pro Pack](#)

Summit Racing's y Vehicle Tie-Down and Axle Strap Pro Pack that has everything needed to secure a vehicle to a trailer. The ratcheting tie-down straps are 2 inches wide and 8 feet long, and have a break strength of 10,000 pounds. The Pro Pack also comes with four axle straps. Each strap has a durable sleeve to protect both the strap and the finish on the axle tube.
