

ROUSH Stage 3 Mustang Earns 50-State Vehicle Emission Certification

ROUSH Performance's 670-horsepower 2016 ROUSH Stage 3 Mustangs have obtained EPA certification in all 50 states.

Plymouth Township, MI ([PRWEB](#)) December 17, 2015 -- ROUSH Performance has earned 50-State Vehicle Emission Certification for all 2016 model year [ROUSH Stage 3 Mustangs](#) powered by the 670-horsepower supercharged 5.0L V8 engine.

Earning 50-state vehicle emissions and ongoing emissions diagnostics certifications ensures emissions compliance and fault detection for the full useful life (120,000 miles) of the vehicle emissions system as defined by the Environmental Protection Agency.

“Emissions certification as an MOR, or Manufacturer of Record, requires us to meet the same standards as original equipment manufacturers like Ford Motor Company. Having this certification is important, as it allows us to build ROUSH Mustangs as pre-titled vehicles,” explains Gary Jurick, president of [ROUSH Performance](#). “The level of engineering, durability and compliance testing necessary to meet strict 50-state emissions certifications from CARB and the EPA is a prerequisite for enabling our dealers to sell a Roush Mustang as a new vehicle.”

The entire 2016 ROUSH Stage 3 Mustang is built to ROUSH's exacting standards at its manufacturing facility just east of Detroit, Michigan. Well-trained professionals build each ROUSH vehicle with a high degree of repeatability, reproducibility, and traceability. Once built, each vehicle must then pass through an extensive end-of-line review and inspection process before being shipped to the customer.

“We test everything to a vehicle manufacturer's standard,” says Justin Schroeder, vehicle director of ROUSH Performance. “Superchargers, exhaust systems, suspension, wheels, even the decals, are tested to guarantee quality. Emissions, however, is a critical piece that's a core component to our manufacturing. You can't skip that step because ROUSH is a performance vehicle manufacturer, not a tuner.”

About ROUSH Performance: ROUSH Performance, a division of Roush Enterprises, designs, engineers and manufactures completely assembled pre-titled vehicles, aftermarket performance parts, performance crate engines, and marine engine superchargers for the global performance enthusiast market. Based in Plymouth Township, Michigan, ROUSH Performance was founded in 1995 by motorsports legend Jack Roush. Visit us at [ROUSHperformance.com](#) or call 800.59.ROUSH.
