

New at Summit Racing Equipment: KYB Strut-Plus Strut Assemblies

Summit Racing now carries KYB Strut-Plus Strut Assemblies. The Strut-Plus is a complete unit that comes factory assembled--just remove the old parts and install the Strut-Plus.

Tallmadge, OH ([PRWEB](#)) June 10, 2016 -- Summit Racing now carries [KYB Strut-Plus Strut Assemblies](#). The Strut-Plus is a complete unit that comes factory assembled--just remove the old parts and install the Strut-Plus. That means no parts sourcing, less chance for assembly errors, and shorter installation time.

Each KYB Strut-Plus Assembly features:

- Gas-charged Excel-G strut that restores ride and handling to OEM specs
- Custom-tuned coil spring
- OEM quality bearing plates and insulators to maintain proper front end alignment
- Polyurethane boot and travel-limiting bumper

What's more, KYB manufactures Strut-Plus assemblies for specific applications, not just a general range of vehicle models. That means vehicle owners get the exact ride and handling performance the vehicle had when it was brand new.

Summit Racing carries KYB Strut-Plus Assemblies for many domestic and imported cars and trucks made from 1985 through 2013. We also carry KYB Strut Mount Plates to replace rusted or worn out mounts.
