

New at Summit Racing Equipment: PowerNation Engine Power In House Power Mouse Chevy Parts Combos

Summit Racing now carries PowerNation Engine Power In House Power Mouse Chevy Parts Combos. The Engine Power team squeezed a lot of power out of a 355 C.I.D. small block Chevy while staying under a \$4,000 cap.

Tallmadge, OH ([PRWEB](#)) June 24, 2016 -- Summit Racing now carries [PowerNation Engine Power In House Power Mouse Chevy Parts Combos](#). The Engine Power team squeezed a lot of power out of a 355 C.I.D. small block Chevy while staying under a \$4,000 cap. On the dyno, the engine made 357 horsepower 389 lbs.-ft. of torque.

The Engine Power guys built the motor using tools a typical home mechanic would own, and revealed some techniques that deliver results comparable to a precision machine shop, yet can be used at home with a shoestring budget. See the whole build on [PowerNation TV's](#) web site.

The In House Power Mouse Parts Combos cover the short block, oiling system, valvetrain, induction, and ignition system—just add some time and labor and an enthusiast will have a nice, streetable engine.

Engine Power isn't done with In House Power Mouse. Future builds will open the purse strings to unleash some serious power.
