

Hyundai Translead Goes Live with SAP(R) Service Management

The Baer Group, a national SAP Services Partner, announced that Hyundai Translead, one of America's major producers of dry freight and refrigerated van-trailers, containers, chassis, and specialized equipment for the military, has gone live with an implementation of SAP Service Management (SM) in its newly built plant in Tijuana, Mexico.

([PRWEB](#)) February 7, 2003 -- Atlanta, GA -- February 10, 2003 -- The Baer Group, a national SAP Services Partner, announced that Hyundai Translead, one of America's major producers of dry freight and refrigerated van-trailers, containers, chassis, and specialized equipment for the military, has gone live with an implementation of SAP Service Management (SM) in its newly built plant in Tijuana, Mexico.

Hyundai Translead was able to leverage its existing mySAP investment by simply enabling the Service Management (SM) module already available in its existing SAP software. Hyundai Translead is running an SAP R/3 4.5B system with FI, CO, SD, MM/MM and PP core modules at its headquarters in San Diego, California and at its older plants in Tijuana. By turning on the SM module and extending the enterprise structure, Hyundai Translead was able to support its a new plant and new line of business.

A benefit of the newly added functionality, SM provides Hyundai Translead with more advanced reporting capabilities to capture detailed service information of their operation. Other significant work completed by The Baer Group included the implementation of extensive barcode scanning processes for both production and warehouse management (WM) transactions. Intermec radio frequency (RF) equipment was configured and integrated to control materials and to track parts induction into production.

An important component of the project involved The Baer Group replicating central back-office functionality in FI/CO, MM and SD for the new plant and thus leveraged Hyundai Translead's existing SAP investment.

"We at Hyundai Translead, were very impressed with The Baer Groups visionary abilities. I was pleased that The Baer Group was able to complete our project on-time and under budget," stated Joe Preski, Vice President of MIS. "The project ran simultaneously with the construction of our new plant, and was live and in sync with the first day of production. We are looking forward to doing additional projects with The Baer Group."

The Baer Group, LLC

The Baer Group is a national SAP Services Partner that provides a range of SAP consulting services throughout the SAP product life cycle, including implementation, project management, training, system upgrades, development, new module implementation, and contract and permanent staffing.
