

Classic Components Announces Chrome Plating Motorcycle Wheels In Stock For Exchange

Classic Components, Inc. wheel exchange provides chrome plating motorcycle wheels without any waiting. Customers can exchange their manufacturer set of wheels for the same with chrome plating from over 300 sets that Classic Components has in stock.

Santa Ana, CA ([PRWEB](#)) January 02, 2013 -- Classic Components, a national provider of chrome plating for automobile and motorcycle wheels and parts with over 75 years of combined industry experience, has announced the Chrome Exchange program. The complete information is available on the site at [ChromePlating.com](#).

Customers can upgrade their factory wheels to chrome plating ([www.classiccomponents.com](#)) wheels without the wait. Classic Components, Inc. stocks over three hundred sets of chrome plating motorcycle wheels for several different brands of motorcycles. The Chrome Exchange program takes the wait out of having chrome plating on wheels.

Without having to wait for a set of chrome plating put on motorcycle wheels, the in-stock wheels ship the next business day. The convenience takes out any downtime that was once a hindrance for many motorcycle owners.

Customers only pay for the chrome plating and shipping. There is never a charge for a new set of wheels. Since the wheels are genuine manufacturer's wheels, there are not any worries about aftermarket wheels.

The value that comes with a set of chrome plating motorcycle wheels ([www.classiccomponents.com/chrome-exchange](#)) includes the fact that these are original equipment wheels. The motorcycle will retain the resale value as compared with aftermarket wheels. The value also increases on the motorcycle since the exchange is for chrome plating wheels.

With the Chrome Exchange program at Classic Component's chrome plating company, customers can start the process with a core deposit or by sending in wheels and requesting an exchange. Classic Components has made it easy to change out the motorcycle wheels quickly by stocking over three hundred sets. Chrome plating motorcycle wheels that are in stock are shipped in the next business day. Classic Components also offers black chrome plating on wheels for an additional charge.

Go to the Classic Components chrome plating company ([www.classiccomponents.com/company/about](#)) website at [ChromePlating.com](#) to view the Chrome Exchange and receive more information on the program.
