

Cross Lander SRV to Make a Real Impact on the US SUV Market

Cross Lander Provides a Rugged Off Road 4x4 with Amenities to Suit American Preferences

([PRWEB](#)) April 20, 2004 --The Cross Lander 244X is the first model in a new line of affordable, rugged sport vehicles from Cross Lander USA.

The Cross Lander 244X is the first truly affordable mid-sized sport recreation vehicle (SRV), with rugged off-road capabilities, fulfilling the needs and expectations of serious off-road enthusiasts.

The Cross Lander 244X is a new breed of all-terrain vehicle that is not for everyone. A no nonsense, no frills, off-road sport vehicle.

The Cross Lander 244X is made with a full chassis, putting it in a class that includes only the most powerful off-road vehicles on the market. All others currently available in the United States are made with a unibody design, which is not nearly as strong because they are designed to be lightweight. True off-road consumers demand a full chassis.

The Cross Lander 244X is based on the Auto Romania (ARO), a vehicle that possesses a solid track record for quality, performance and endurance. ARO (Auto Romania) is the national Romanian automotive company that has been manufacturing rugged, off-road vehicles and light trucks for more than 50 years.

Cross Lander Product Fact Sheet

No other vehicle on the market can compete with Cross Lander in value, reliability and ruggedness. The Cross Lander 244X complies with all U.S. National Highway Transportation Standards Association standards as well as Department of Transportation and Environmental Protection Agency regulations.

Cross Lander Specifications

Engine:

- Type: 4.0 liter V-6
- Aspiration: EFI
- No. of Cylinders: 6
- Bore & Stroke (mm): 3.95 x 3.32
- Compression Ratio: 9.7:1
- Maximum Horsepower: 207
- Max Torque: 238
- R.P.M @ Max Torque: 3000

Transmission:

- Wheel Drive: Permanent 4x2; Part Time 4x4
- Type: 5-speed; Manual and/or Automatic
- No. of Gears: 5 + 1 synchronized
- Ratio of Gears: 3.40; 2.05; 1.31; 1.00; 0.79; Reverse 3.40

Suspension:

- Front Axle: Coil Springs & Shock Absorbers
- Rear Axle: Leaf Springs & Shock Absorbers
- Differential: Symmetrical
- Ratio: 3.73
- Brakes: Hydraulic Dual Circuit, Power Assisted
- Front Axle: Ventilated Disc
- Rear Axle: Drum
- Power Steering: Hydraulic Power Assisted
- Turning Radius: 41 Feet
- Max. Slope (degrees): 40

Dimensions:

- Length: 178 in.
- Width: 72.2 in.
- Height: 73 in.
- Wheel Base: 102 in.
- Ground Clearance: 7.8 in.

Fuel Consumption:

- City: 17 MPG
- Highway: 22 MPG
- Fuel Capacity: 25 Gallons
