

Inventors and InventHelp Clients Develop Safety System for Police Officers (HLW-1704)

InventHelp, a leading invention company, is submitting the 360 ALERT to companies for their possible feedback.

PITTSBURGH, PA ([PRWEB](#)) December 09, 2016 -- Violent crimes seem to dominate the news daily, and nowadays even the people who are hired to fight against violent criminals have become victims of them. Alarmed by the growing trend of injurious and fatal ambushing of unsuspecting police officers, two inventors from Davie, Fla., decided to design and develop a way to prevent these crimes and tragedies. "We eventually came up with the patent-pending 360 ALERT to meet this need," said one inventor.

This system improves safety for police officers as they sit in their patrol cars. It alerts officers to the presence of people or other vehicles in their immediate vicinity , which prevents the success of surprise attacks. Featuring an easy-to-use design and producible in design variations, the 360 ALERT helps avoid injuries and fatalities of officers, which promotes peace of mind.

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-HLW-1704, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
