For Immediate Release

Weekend Bridgework Scheduled on Carlisle Boulevard over I-40

Albuquerque, NM—The New Mexico Department of Transportation (NMDOT) District Three and RAM Construction is scheduled to continue work on the Carlisle Bridges over I-40 and the diversion channel, on Friday, May 13 at 9 p.m. through Monday, May 16, at 5 a.m. Crews will work on the inside left lanes in north and southbound directions, motorists will be able to access the right lanes only in both directions. Last weekend crews completed work on the right lanes in both north and southbound directions. Motorists should expect delays in this area. Inclement weather could cause delays because of the curing process required for material to set.

I-40 on and off-ramp accessibility:

- The east and westbound off-ramps from I-40 to Carlisle will be restricted to one right turn lane only. Left turns from the I-40 off ramps will not be permitted.

All lane restrictions will be posted on message boards in the area. NMDOT recommends use of alternate routes to ease congestion. Lanes are scheduled to re-open by Monday, May 16 by 5 a.m. unless crews are able to complete the work early. Motorists should proceed through the work zone with caution and observe traffic control signs. For project-related traffic updates visit www.nmroads.com.
