

## **Research and Markets : Automotive Components success in the Chinese Market**

*China's demand for automotive components has developed at a fast pace in the past decade. In the next five years, both production and demand will continue to grow.*

([PRWEB](#)) March 4, 2005 -- Research and Markets (<http://www.researchandmarkets.com/reports/c13479>) has announced the addition of Chinese Markets for Automotive Components to their offering.

China's demand for automotive components has developed at a fast pace in the past decade. In the next five years, both production and demand will continue to grow.

The living standard in China has improved significantly since the economic reform. An increasing number of high-income families have gained wealth that enables them to purchase high-priced items, such as automobiles, therefore it creates a boom in the automotive components industry

This report introduces China's macroeconomic trends, business environment, automotive components industry structure and capacity, production and demand, major producers, potential entrants' consumption trends, distribution channels and major industry participants. It includes forecasts for major automotive components production. Tables and charts are contained and key producers are listed.
