

InventHelp Inventor Develops Tool for Changing Serpentine Belt (JMC-2022)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Belt Tension Releasing Tool, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) October 16, 2017 -- "Changing the serpentine belts on late-model Volvo* and Mack* trucks with VED 13 and MP8 engines is tough work because the belts are in tight, nearly inaccessible places," said an inventor from Los Lunas, N.M. "I came up with this labor-saving tool to make the task easier."

He created a prototype for the BELT TENSION RELEASING TOOL to Provides a more efficient way to change the serpentine belt on the engines of these late-model trucks. It easily releases the tensioner on the pulley. This is designed to enhance personal safety. The device is easy to install and use. Additionally, the tool features durable construction.

*InventHelp is neither affiliated with nor endorsed by Volvo or Mack, the manufacturers of VED 13 and MP8 engines, which hold trademarks.

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-JMC-2022, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
