

Protective Enclosure Invented for RV Steps and Windows (VIG-299)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the RV and Camper Step and Window Cover, to applicable companies for their consideration.

PITTSBURGH, Pa. ([PRWEB](#)) October 18, 2017 -- With the growing popularity of campers and other RVs, users need a way to prolong the life of their vehicles. Fortunately, an inventor from Hampton, Va., has come up with just the right idea.

He developed a prototype for the patent-pending RV & CAMPER STEP AND WINDOW COVER to protect RV steps from damage and keep them clean when they are in a closed and locked position during travel. There is also a version that safeguards an RV window from weather damage while the vehicle is in storage and prevents interior damage from exposure to sunlight during the off-season. Furthermore, this innovative unit is durable for years of continuous use and is easy to apply, remove and maintain. Other appealing features include convenience, effectiveness and an affordable price.

The inventor's personal experience inspired the idea. "I love to use my camper and wanted to find a way to keep it in good condition. I was particularly concerned about the maintenance of the pull-out steps and the windows," he said.

The original design was submitted to the Virginia Beach office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-VIG-299, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
