

Inventors Develop Safety Accessory for Motorcycle Passengers (SAH-800)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Get a Grip, in the hopes of a good faith review.

PITTSBURGH, Pa. ([PRWEB](#)) December 07, 2017 -- "We found that our hands got sore when we were a passenger on a motorcycle because we had to wrap our arms so tightly around the driver," said one of two inventors from Kelseyville, Calif. "We came up with this idea to provide a safer, more comfortable way to hold on."

They created a prototype for the GET A GRIP to provide a more comfortable way to hold onto the driver while riding on a motorcycle as a passenger. The accessory ensures that the passenger has a firm hold on the driver. The unit alleviates stress and strain on the hands and fingers. The device reduces the risk of falling off while riding as a passenger. It is designed to promote roadway safety by minimizing the incidence of injuries. Additionally, the accessory is usable on other vehicles where two people ride together.

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SAH-800, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
