

## **Black Rhino Aftermarket Truck Wheels introduces the Fury**

*The Black Rhino Fury is a fresh race inspired mesh wheel that by design blurs the line between high performance motorsport and off-roading. The all new Fury is an artisanal multi-spoke mesh truck rim with a big appetite for off-roading.*

BREA, Calif. ([PRWEB](#)) January 14, 2020 -- The Black Rhino Fury is a fresh race inspired mesh wheel that intentionally blurs the line between high performance motorsport and off-roading. The all new Fury is an artisanal multi-spoke mesh [truck rims](#) with a big appetite for off-roading.

The New Classic.

Black Rhino's Fury is a tribute to the classic mesh design, reimagined for off road enthusiasts with a satisfying composition of bold details and tasteful aesthetics that check off all the right checkmarks. These true to purpose [off road wheels](#) showcase Black Rhino's unique talent to toughen up an iconic motorsport wheel design and repurpose it to conquer man-sized boulders.

The classic mesh spokes are masterfully designed with Black Rhino's trademark boldness and simplicity in mind. Straight cut windows showcase the strong spoke architecture, tactfully blending out to a chamfered perimeter lined with reinforced grade 8.8 hardware.

Deep Functionality.

With all Black Rhino [off road wheels](#), functionality is at the forefront of design and the Black Rhino Fury [truck wheels](#) plays no exception. The dynamic range of the Fury's wheel topography starts with an angular concave face, a deep slanted lip and an extra wide rim edge - a result of strength engineered into the design.

The Black Rhino Fury truly is a one-of-a-kind off road wheel with its unmistakably brawny stance that pays homage to race bred machines, yet stays true to being a truck rim that's unapologetically raw and rugged.

The Black Rhino Fury [off road rims](#) are available in a monochromatic Gloss Black colorway with Silver hardware and Matte Gunmetal with Satin Black hardware. The Black Rhino Fury off road rims are available in 20x11.5 and 22x11.5 sizes, with offsets ranging from -12mm to +52mm for five and six lug bolt patterns.

Discover all of Black Rhino's off road wheels and [truck wheels](#) by visiting the simple to use online Fitment Guide on our website to see all possible off road wheels based on year, make and truck model. The Fitment Guide will also introduce visitors to all other important technical details that are significant, such as offset (positive, neutral or negative), load carrying ratings and live factory warehouse inventory levels.

The Black Rhino Truck Wheels Configurator tool goes a step further and allows truck enthusiasts to visualize all compatible Black Rhino off road rims on a realistic render based on year, make, model and even color for most trucks and SUVs.

The company's website [www.blackrhinowheels.com](http://www.blackrhinowheels.com) includes helpful dealer locator tools, by zip code in the United States and internationally. The website also features dealer support tools, including online access to the live inventory in Black Rhino's new 155,000 sq. ft. headquarters in Brea California. For dealers, all Black Rhino truck rims can be ordered on the website and orders received by 4pm ET are shipped the same day.

Black Rhino, an off road rims manufacturer with a South African heritage, donates a portion of all Black Rhino truck wheels' sales to combat the complex Rhino poaching crisis in South Africa. That means the impact of your purchase and passion goes beyond truck rims themselves - it enables the conservation efforts that help protect the native Black Rhino from extinction.
