

## **Rebuilt Jeep Engines Now Sold to SUV Owners at RemanufacturedEnginesforSale.com**

*Rebuilt Jeep engines are now sold to SUV owners online at RemanufacturedEnginesforSale.com. This company is now building the PowerTech motors for the Jeep series and these are sold online to SUV owners or companies that purchase motors for direct installation for customer vehicles.*

San Francisco, California ([PRWEB](#)) January 11, 2013 -- Jeep is one of the most popular SUVs sold in North America and one company is now offering replacement engines for these vehicles. The series of rebuilt Jeep engines are now for sale online at the Remanufactured Engines for Sale company website. This integration of the PowerTech series is designed to help SUV owners and installers of these engines find replacements for a discounted price. The entire company inventory can now be searched online at <http://www.remanufacturedenginesforsale.com/jeep-engines-2/jeep-commander-engine>.

The Commander, Cherokee, Grand Cherokee and Wagoneer represent some of the famous SUVs that have been produced by Chrysler for its Jeep brand. The sales of these vehicles have helped this automaker to be positioned at the top of the SUV market for mid-size units.

The V6 and V8 motors that are designed and used in this series of vehicles use updated technologies to assure driver confidence. The engines that are now offered online are completely reconditioned to provide an alternative to preowned units.

Remanufacturing of motors is one way that automotive companies are using to expand the useful life of a used unit. Engines are disassembled, cleaned and new parts are added to complete a like new effect that is ready for testing purposes. The testing phases are designed to provide the reliability of each rebuild and these are sold to vehicle owners and companies that resell engines. The RemanufacturedEnginesforSale.com company has invested into top technologies and employs a staff of trained employees who complete all company rebuilds.

Warranty issues can happen with engines that are not serviced properly during ownership. One of the biggest contributors to a total breakdown is high mileage. A motor that has worn parts is likely to fail and many preowned vehicles have engines that are ready to fail or that have failed. A new warranty policy for online and offline sales is now helping buyers of engines to receive protection that will help determine the lifespan of the remanufactured engines that are now sold.

New warranty terms were proposed in the fall of 2012 and a 3-year extension has been created. This new extension applies to all motors that are rebuilt from the company engineering facility. The first roll out of this measure was for the Dodge lineup. The success of this program has helped to make all in stock inventory eligible for this new warranty protection. The news announcement for the Dodge series can be found at <http://www.prweb.com/releases/remanufactured-dodge/engines-for-sale/prweb9854325.htm>.

### About Remanufactured Engines for Sale

The Remanufactured Engines for Sale company has sold its inventory online since 2009.
