

Greg May Hyundai proves great things come in small packages

The 2021 Hyundai Venue is a small but flexible crossover SUV and the 2022 Hyundai Tucson will arrive next year with an all-new look and more available powertrains.

WACO, Texas ([PRWEB](#)) November 18, 2020 -- The next several months are going to be very exciting in and around the Greg May Hyundai showroom. Not only has the 2021 model year really started to hit its stride, but the next generation of Hyundai vehicles are ready to reignite customer-interest in the automaker. Crossover SUVs have become the dominant vehicle platform on American roads and Hyundai has several options that have become very popular with buyers. The 2021 Hyundai Venue might be the manufacturer's smallest crossover SUV, but that doesn't mean it's lacking in capability. It demonstrates the kind of flexibility that made crossover SUVs so popular, while still providing a light and nimble footprint. Additionally, the product experts at Greg May Hyundai are anxious to let future customers know what the 2022 Hyundai Tucson will have to offer.

Hyundai did an excellent job of designing and [executing the primary purpose of the 2021 Venue](#). It was built to be able to easily navigate crowded city streets while also delivering a very usable interior. When people are sitting in the backseat, there will still be more than 18 cubic-feet of cargo volume to use. Folding the rear seat down will expand the available cargo volume measurements to nearly 32 cubic-feet. These number may not seem like a lot, but the unique geometry used by the 2021 Venue allows it to carry a lot.

Additionally, when the 2021 Venue is on the road, it will make 121 horsepower while also posting Environmental Protection Agency fuel economy scores of 30 miles per gallon or higher in the city or on the highway.

Greg May Hyundai customers can start the pre-ordering [process to reserve the 2022 Hyundai Tucson today](#). When the completely redesigned Tucson arrives at the dealership's showroom, it will be available with a wide range of new powertrains, including hybrid and plug-in hybrid options. Additionally, the all-new Tucson will be slightly larger to allow for more passenger space and cargo volume across its entire lineup.

Anyone can view the entire Greg May Hyundai inventory by visiting the dealership's website, www.gregmayhyundai.com. The showroom is located at 1501 West Loop 340, Waco, TX 76712. Customers can inquire about the latest Venue or all-new Tucson today by calling, 833-310-1026.
