

## **PRECO Electronics Introduces New Active Vision Systems for Medium- and Heavy-Duty Trucks**

*PRECO's Delivery of Compact and Powerful Monitors and Cameras Allow Operators to Maximize Cab Space with Comprehensive Collision Mitigation Technologies*

Boise, Idaho and New Orleans, LA ([PRWEB](#)) May 09, 2017 -- [PRECO Electronics](#), the global leader in heavy-duty vehicle collision mitigation, today announced the immediate availability of its expanded vision system offerings. PRECO's new suite of monitors and cameras, including PreView® Monitor 5 HD, PreView® Monitor 5 LD, PreView® Mini Cam, and PreView® Mirror Monitor, provides customers with a wide range of flexibility and ability to integrate PreView® radar sensors to help mitigate accidents, improve fleet operations, and further assist with blind spot monitoring.

“PRECO's new suite of monitors and cameras satisfies our customers demand for safety technology to improve situational awareness for vehicle operators,” said [Tom Loutzenheiser](#) (@tomloutz), Vice President of Business Development at PRECO. “PRECO is the leader in integrating radar and vision technologies, and our new vision systems provide fleets with more collision avoidance options.”

Introduced at the [2017 WasteExpo Conference](#), PRECO's [suite of new cameras and monitors](#) is in direct response to the needs of PRECO's growing customer base. PRECO's expanded suite of monitors and cameras allows medium- and heavy-duty fleets to maximize cab space and integrate the industry's most flexible blind spot monitoring technology available. Specific products include the release of:

- PreView Monitor 5 HD: PRECO's heavy-duty 5-inch monitor is water proof and can support up to three cameras. The monitor can switch between all three-camera views when turn signals or reverse is engaged.
- PreView Monitor 5 LD: PRECO's light-duty monitor is best suited for enclosed cab use. Great for on-road fleet vehicles that don't require a weather resistant outer shell.
- PreView Mirror Monitor: Developed for when cab space is at a premium, the PreView Monitor provides operators with a top-of-the-line vision system while not competing with other devices in the truck.
- PreView Mini Cam: With three field of view options -120, 150 and 180 degrees- this compact camera allows for easy 360 degree blind spot coverage with the addition of multiple cameras.

Today's announcement builds upon PRECO's premium 7-inch vision system PreView® Plus. PRECO's entire suite of solutions provides operators with all-in-one heavy-duty safety systems that integrate cameras and monitors with PRECO's intelligent radar sensors.

PRECO is located at WasteExpo booth #1847, taking place May 8-11 at the New Orleans Ernest N. Morial Convention Center.

### About PRECO Electronics

PRECO is the global leader of collision mitigation solutions for heavy-duty equipment industries. PRECO believes that those responsible for heavy-duty equipment operations have a desire to keep the people and property around them safe and free from harm. We design, engineer and manufacture collision mitigation technology optimized for heavy-duty equipment. Our safety products have survived the industry's most rigorous testing for unstoppable performance in the harshest working conditions imaginable, so operators and fleets can perform with greater confidence and peace of mind.

Established in 1947, PRECO has been providing safety solutions to heavy-duty industries for almost 70 years. Learn more at [www.PRECO.com](http://www.PRECO.com) and follow us on Twitter @PrecoElec.
