

## Great Taste to feature Vehicle Systems, Inc.

*Vehicle Systems, Inc. specializes in hydronic heating systems (heating with hot water) for the conventional Type-A RV diesel motor homes.*

Deerfield Beach, FL ([PRWEB](#)) June 19, 2004 -- Platinum Television Group is pleased to announce the selection of Vehicle Systems, Inc. for its innovative, educational television series, Great Taste, to be featured in a segment on Travel Solutions RVs.

Vehicle Systems, Inc., located near Denver, CO, and founded in 1984, specializes in hydronic heating systems (heating with hot water) for the conventional Type-A RV diesel motor homes. Since 1989, when their first heating system, the Aqua-Hot, was introduced to the RV market, Vehicle Systems have been a trusted name among motorists and widely regarded as the best manufacturers in the business.

Sufficient heat and hot water are unfortunately a luxury in most RV campers, but with Aqua-Hot, and its little brother system, the Hydro-Hot, continuous on-demand hot water and interior heat are guaranteed. There are no attachments or supplementary power required, either; the heaters' power sources are all completely contained within the RV itself. Their diesel-fueled burners use the RV's diesel supply and battery power, and their electric heating elements feed on AC power, ensuring that the customer no longer has to deal with the added expense of propane. Any RV with a diesel tank (which is practically all) is compatible with Vehicle System's products they can even be retrofitted to older RVs.

While there is a difference between the large, heavy duty Aqua-Hot and the smaller Hydro-Hot (which was introduced in 1998 and meant for mid-sized RVs), there is no discrepancy in quality. Both boast three separate interior heat zones for maximum comfort and heat throughout the whole interior, in addition to the one heating zone for the water tank.

Their manufacturing facility has over 11,000 square feet of working area and is located on 20 acres of land, which allows for plenty of expansion. The segment will show how the products are manufactured as well.
