

Toad Industries Introduces "The Original Motorcycle Wheel Lift."

Unique new wheel lift works with most motorcycle jacks and lifts to take the hard work out of motorcycle wheel and brake jobs.

BIG RAPIDS, MI ([PRWEB](#)) September 3, 2004 -- Toad Industries LLC has introduced The Original Motorcycle Wheel Lift. The rugged new wheel lift is designed to work in conjunction with most motorcycle lifts and jacks, making wheel and tire maintenance simple and easy.

The Original Motorcycle Wheel Lift is quality-constructed in the U.S. of rugged steel framing with a durable powder coat finish. It moves freely with the push of a hand and can be rolled to any work area. The 14" wheel cradle allows for tire widths up to 13 3/4", and lifts or jacks up to 18" high. The Original Motorcycle Wheel Lift works easily in conjunction with most motorcycle lifts and jack stands, and can be used for either front or rear tire removal and installation. When not in use, it can be easily folded up for convenient, out-of-the-way storage. The lift can be used anywhere tire and wheel maintenance is performed -- commercial repair shops, home garages, even at races or other outside events.

The Original Motorcycle Wheel Lift retails for \$329.95, requires minimal assembly, and is shipped directly from Toad Industries' factory in Michigan.

For more information about The Original Motorcycle Wheel Lift, visit <http://www.toadindustries.com> or call Toad Industries toll free at (877) 796-7101.
