Enrich and Corcentric Announce e-Commerce Integration

Richer Systems Group, Inc. and Corcentric announce intention to integrate the enrich Transportation and Fleet Management Systems with the Corcentric Optimal eFlow System

([PRWEB](#)) October 21, 2004 -- Richer Systems Group, Inc. (RSG), the leader in software solutions for the fleet management industry and Corcentric, a business-to-business e-Commerce solution announced today that an integration effort has begun to tie together AmeriQuestÂs Procurement Program, developed by Corcentric with the enrich Transportation Management & Fleet Management Systems.

The partnership will allow purchase and invoice data to flow automatically between the 100 plus vendors currently using the Corcentric eHub developed for AmeriQuest and the leading transportation and fleet management providers using the enrich system. A seamless and automated process will eliminate significant overhead for enrich users and allow them to approve invoices online, receive invoices faster, eliminate lost invoices, and automate GL coding of invoices into the enrich accounts payables. Hogan Motor Leasing, St. Louis, MO, will be the first customer to use the integrated capabilities being developed.

Eric Richer, president of Richer Systems Group, said, "Hogan has been an important customer of enrich and we are pleased that we can provide new capabilities through the integration to support our customers drive to grow their business, reduce overhead, and serve their customers better."

"enrich has been in use at Hogan Motor Leasing since 1999 and has allowed Hogan to grow significantly without significant additions to our overheads," said Brian Hogan, President and CEO of Hogan Motor Leasing. "We have also enjoyed real benefits in our purchasing through CorcentricÂs eHub. The integration that will tie these two important business systems together will support our continued growth and create new opportunities for efficiencies in our business."

Doug Clark, CEO and President of Corcentric explains, "this announcement with enrich reflects our commitment to establish long-term partnerships which support continuous cost improvements and productivity enhancements for all of our participants. We anticipate rapid adoption of these capabilities by our participants."

Introduced 7 years ago, RSGÂs enrich Transportation and Fleet Management Systems offers best of breed applications for every aspect of the transportation services industry from full service lease and rental operators to common carriers. Comprehensive functionality, complete integration, and simplified IT administration are the hallmarks of the enrich software system. Customers can deploy the enrich software modules, in whole or in part, to meet the unique requirements of each enterprise.
