

## **Honda 2006 Ridgeline Pickup has Superior Honda Replacement Parts at Parts Train to maintain its Exceptional Performance**

*The Honda Ridgeline is the pickup truck segment's first four-wheel, fully independent suspension system combined with an advanced fully automatic four-wheel drive system to "deliversuperior ride and handling versus traditional truck designs. Body bending rigidity is more than 2.5 times stiffer than the best performing body-on-frame compact truck competitor is and rear torsion rigidity is more than 20 times stiffer. Parts Train's high quality Honda body parts, Replacement Parts, can maintain all of these impressive qualities of the Honda Ridgeline Pickup.*

([PRWEB](#)) May 8, 2005 -- "The Honda Ridgeline delivers all the capabilities of a truck with none of the traditional truck trade-offs.," said Dick Colliver, executive vice president of American Honda Motor Co., Inc. The Honda Ridgeline is the pickup truck segment's first four-wheel, fully independent suspension system combined with an advanced fully automatic four-wheel drive system to "deliver superior ride and handling versus traditional truck designs

It has innovative new truck body construction and steel reinforced composite bed to deliver half-ton hauling capability and 5,000-pound towing. The Ridgeline has a number of exclusive new features including a Dual-Action tailgate and the industry's first In-Bed Trunk. The In-Bed Trunk features 8.5 cu.-ft. of secure, lockable and water resistant storage space. The spare tire is stored in a sliding tray inside the trunk and can accommodate a full-size spare tire.

Due to its wide bed and minimal wheel arch intrusion, the Ridgeline can also carry 4-foot wide sheets of building material flat on the floor, something no other compact or mid-size truck can do. It has a fully integrated truck frame with two longitudinal frame rails and seven high-strength steel cross members that create a fully boxed, deep channel, ladder frame structure fully integrated into the upper body of the vehicle. Body bending rigidity is more than 2.5 times stiffer than the best performing body-on-frame compact truck competitor is and rear torsion rigidity is more than 20 times stiffer.

Designed for excellent all-weather handling, traction and off-road ability, its standard Variable Torque Management 4-Wheel Drive System (VTM-4WD) can transfer up to 70 percent of available torque to the rear wheels.

Parts Train's high quality Honda body parts, Replacement Parts, can maintain all of these impressive qualities of the Honda Ridgeline Pickup. Years of delivering superior product lines have made Partstrain a favorite among car enthusiasts. Like Honda, Partstrain does its best among competitors.

All genuine quality Honda Pickup spoiler, radiator, electrical parts, engine parts, hood, hubcaps, condenser, bumper, catalytic converter, exhaust, fender, grille to name a few are available to you in great discounts and wholesale deals at Partstrain
