

Volkswagen Passat with Nokia Blue Tooth Technology: VW Aftermarket and Replacement Parts

Volkswagen is the first automaker to offer its customers a factory-fitted automotive communication solution that supports the Bluetooth SIM Access Profile. The Nokia Car Phone with Bluetooth Technology for the VW Passat is set for launch in Europe and Asia in 2nd quarter 2005.

([PRWEB](#)) June 17, 2005 -- Volkswagen is the first automaker to offer its customers a factory-fitted automotive communication solution that supports the Bluetooth SIM Access Profile. The handset integration product provides compatibility with a wide range of mobile phones from various manufacturers. A mobile phone holder is also offered as an option for users who wish to charge their phone in the car.

The Nokia Car Phone with Bluetooth Technology for the VW Passat is set for launch in Europe and Asia in 2nd quarter 2005. "For the first time, an automaker is offering a communication solution using the Bluetooth SIM Access Profile that is factory-fitted in the vehicle. This represents an important engineering achievement: we have taken a further step toward universality and factory-installed, integrated communication solutions. The user can now take advantage of wide-ranging compatibility with a large number of mobile phones without having to rely on aftermarket solutions", says Marcus Stahl, General Manager Nokia Automotive.

The Nokia Car Phone with Bluetooth Technology can access the SIM card of the compatible mobile phone and log onto the GSM network. As soon as the user gets out of the car or presses a certain button on his mobile phone, the receiving mode is deactivated and the mobile phone automatically logs back onto the mobile network.

The VW Passat's Nokia Blue Tooth includes key functions such as radio mute and downloading of phonebook entries from compatible mobile phones via Bluetooth wireless technology, as well as additional basic functions such as voice dial, taking and ending calls, and redial.

As Volkswagen keeps producing cars with cutting edge technology, Partstrain maintains its lead on product excellence by its continuous supply of top grade Volkswagen Aftermarket and Replacement parts.

Partstrain offers top of the line Volkswagen Parts. The customer has a choice from a vast array of Performance Parts, Replacement Parts, Aftermarket Parts and accessories.
