TMW Announces Management Promotions; New Assignments Strengthen Company's Commitment to Customer Service

TMW Systems recently promoted four employees as part of a reorganization designed to further strengthen its commitment to service and support to its customers.

Beachwood, Ohio (PRWEB) July 27, 2005 -- TMW Systems, the premier developer and integrator of enterprise management software for the trucking industry, recently promoted four employees as part of a reorganization designed to further strengthen its commitment to service and support to its customers:

--As an ongoing effort to continue to provide unparalleled customer training and support, Matt Ruth, previously Director of Client Services, has been promoted to Vice President of Professional Services. In this expanded role, Matt will be responsible for both Implementation Services and Client Services.

--Keith Mader has been promoted from Director to Vice President of Development Services. In his seven years at TMW, Keith has played a pivotal role in leading the continued development of TMW's flagship product, TMWSuite™. Keith will continue to oversee all enhancements and improvements to TMW's existing product portfolio.

--Senior Implementation Specialist Reed Dallman, who has long-standing success leading numerous customer implementations during his four-year tenure, has been elevated to Manager of Client Services.

--Shelli Weisz, formerly Director of Implementation Services, has assumed the newly created post of Vice President, Business Development - Europe. In her new position, Weisz will be responsible for assisting TMW's current European channel partner SWAC International in marketing and implementing new systems. Additionally, she will identify other business partners to accelerate TMW's growth throughout Europe.

"One of the keys to our continued growth for the past two decades has been the extensive experience of our team in the 'technology for trucking' field," said Tom Weisz, president and CEO of TMW Systems. "The expertise of these four individuals only strengthens our ability to serve our customers."

About TMW Systems
Founded in 1983, TMW Systems, Inc. is recognized as the premier developer and integrator of enterprise management software designed specifically for the trucking industry. Leveraging the organization's hands-on expertise in trucking and technology, TMW's products - including TMWSuite™ for Windows™ and TL2000 AS/400 platform - enable carriers to easily integrate vital real-time data from every facet of their operations into a single system to maximize dispatch efficiency, improve productivity and customer service and enhance profitability. Based in Beachwood, Ohio, TMW currently serves more than 500 customers globally, including in North America, Europe, China and Latin America.
