For more information, visit www.vehiclehistory.gov.

The National Motor Vehicle Title Information System (NMVTIS) is designed to protect consumers from fraud and unsafe vehicles and to keep stolen vehicles from being resold.

Created by the Anti-Car Theft Act, NMVTIS is required to include data from all state motor vehicle agencies, including brand information that describes a vehicle's prior use and condition and the latest odometer reading. **NMVTIS is the only vehicle history database in the nation to which all states, insurance carriers, and junk and salvage yards are required by federal law to report.** Federal law also requires all insurance companies and all junk and salvage yards in the United States to report their salvage and total loss vehicles to NMVTIS. Because of this, NMVTIS can help car buyers detect fraud and know if a car has been totaled or determined to be salvage or junk, before they buy the car.

Federal law requires that states, before issuing a new title on a vehicle from or purchased in another state, verify through NMVTIS the title being presented and the accuracy of certain other vehicle information. Vehicle information in NMVTIS is available to prospective car purchasers, states, and law enforcement.
