

February 2011

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Recently you may have received a letter regarding this recall but this letter is to inform you that parts are now available to repair your vehicle, if required.

The Pontiac Vibe was engineered and designed by Toyota and built by New United Motor Manufacturing Inc. (NUMMI), a joint venture between Toyota and GM.

Toyota has decided that a defect, which relates to motor vehicle safety, exists in certain 2005 model year Pontiac Vibe vehicles equipped with the 1.8L MFI engine and two-wheel drive transmission. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your 2005 model year Pontiac Vibe is involved in safety recall 10282.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

The Powertrain Control Module (PCM) on your vehicle may have been improperly manufactured and include components that can fail prematurely. In most cases, the engine warning lamp could be illuminated, harsh transmission shifting could result, the engine may stall, or the engine may not start. In limited instances, the engine could stall while the vehicle is being driven, increasing the risk of a crash.

What will we do?

Your GM dealer will inspect the production number of the PCM in your vehicle and, if necessary, replace it. This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the actual inspection time of 15 minutes. If the PCM requires replacement, an additional 25 minutes will be required.

What should you do?

You should contact your GM dealer to arrange a service appointment as soon as possible.

Did you already pay for this repair?
