Recall Number and Description: **11S18 - Air Bag Wire Harness Replacement**

What is the Issue?

On your vehicle, it may be possible for the clockspring to driver side frontal air bag wire harness to chafe on the horn mounting plate. Chafing of this wiring harness may cause the driver side frontal air bag to inadvertently deploy which presents a risk of injury from the deployment of the air bag and/or a loss of vehicle control. This chafing may also cause the air bag warning lamp to illuminate in the instrument panel indicating service is required immediately. The air bag warning lamp should never be ignored - it can indicate that the airbag may deploy inadvertently or that it may not deploy in a crash.

What Are We Asking You To Do?

Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access www.Fordowner.com for dealer addresses, maps and driving instructions.

The vehicle owner is responsible for having this service action performed. Ford Motor Company reserves the right to deny coverage for any vehicle damage that may result from failure to have this recall performed on a timely basis. Therefore, please have this recall performed as soon as possible.
