## NOTICE

*This technical report does not necessarily represent final EPA decisions or positions. It is intended to present technical analysis of issues using data that are currently available. The purpose in the release of such reports is to facilitate the exchange of technical information and to inform the public of technical developments.*

## FOREWORD

The information contained in this document is being supplied in accordance with the Durability Program regulations at 40 CFR § 86.1823-08(e)(1)(B)(1)-(3).

These regulations require the manufacturer to annually submit an analysis which includes a comparison of the relative stringency of the manufacturer's customized/alternative cycle to the U.S. EPA's Standard Road Cycle (SRC), or an "equivalency factor".

The equivalency factors in this document were assembled by the U.S. EPA based on the information supplied by and with verification from the manufacturers. However, if you do find that some information is inaccurate or omitted from this document, please notify the U.S. EPA using the following contact information:

# OVERVIEW

## How to Use the Equivalency Factor Tables

The equivalency factors have been assembled in tabular format along with some certified, vehicle information to help identify the corresponding vehicle including:

- Make;
- Model;
- Engine Displacement;
- Test Group;
- Sales Area;
- Durability Group;
- Applicable Emission Standards; and
- Applicable Full Useful Life (FUL) Mileage.

Below is a brief explanation of each column in the table for the user's convenience. For more details, the user should refer to the regulatory cites, where indicated.

The diagram shows a table with the following columns: Make, Model, Engine Displacement, Test Group, Sales Area, Durability Group, Applicable Emission Standards, Applicable Full Useful Life (FUL) Mileage, and Equivalency Factor (Alternative Cycle / EPA Standard Road Cycle). Red boxes and arrows highlight these columns and point to explanatory text boxes. The text boxes explain: 1) The manufacturer name is listed at the top of each section. 2) The engine displacement for each model or multiple models is listed. 3) The applicable sales area (e.g., California only, Federal only or 50 states) is identified. 4) The applicable emission standards and full useful life mileage are listed. 5) The makes and models for each manufacturer are listed in alphabetical order. 6) The test group and durability group are listed for each model. 7) The equivalency factor for each model is listed.
